

# Parallels® Remote Application Server (RAS)

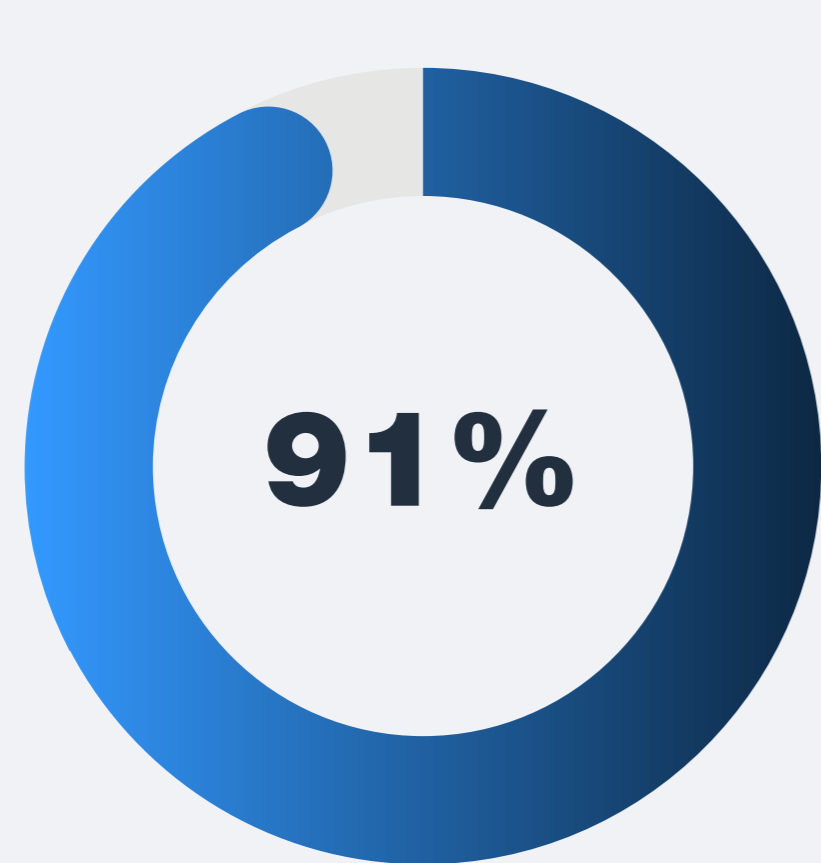

Parallels® Remote Application Server (RAS) is an all-in-one virtual desktop infrastructure (VDI) solution that delivers applications and virtual desktops to any device, anytime, anywhere.

## 5 MAIN REASONS WHY YOUR ORGANIZATION SHOULD START EVALUATING PARALLELS RAS TODAY!

### 1 CAN YOU SUPPORT A REMOTE WORKFORCE?

In a continuous evolving digital workplace, employees may use different devices to access organizational resources from anywhere.

91% of employees say that having remote access to published resources outside working hours is critical for increased productivity.

HOW OFTEN DO YOU WORK OUTSIDE THE OFFICE?

#### SUPERIOR USER EXPERIENCE FROM ANY DEVICE

Parallels RAS enables users to productively work on applications and data from any operating system (OS) and platforms, such as Windows, Linux, Mac®, iOS, Android, Chromebook™, thin client, and HTML5 clientless web access.

“ Parallels Remote Application Server was so easy to deploy! It allows us to access applications from anywhere on any device. Parallels RAS has also allowed us to cut costs by purchasing more budget-friendly Chromebook devices for our users. ”

- Brandon Patton  
Systems Administrator,  
Aspire Indiana

### 2 ARE YOU CONCERNED ABOUT DATA SECURITY?

Data breaches and cyber attacks from the beginning of 2019 are about 5.90 billion, At this rate, with an average of 1.46 billion per months 2020 will close with 17.52 billion of leaked records.

**\$2.1**

Trillion, could be the global cost for data breaches for companies.

38% of the organizations are concerned about mobility or BYOD data security policies in the workplace.

#### ENHANCED DATA SECURITY

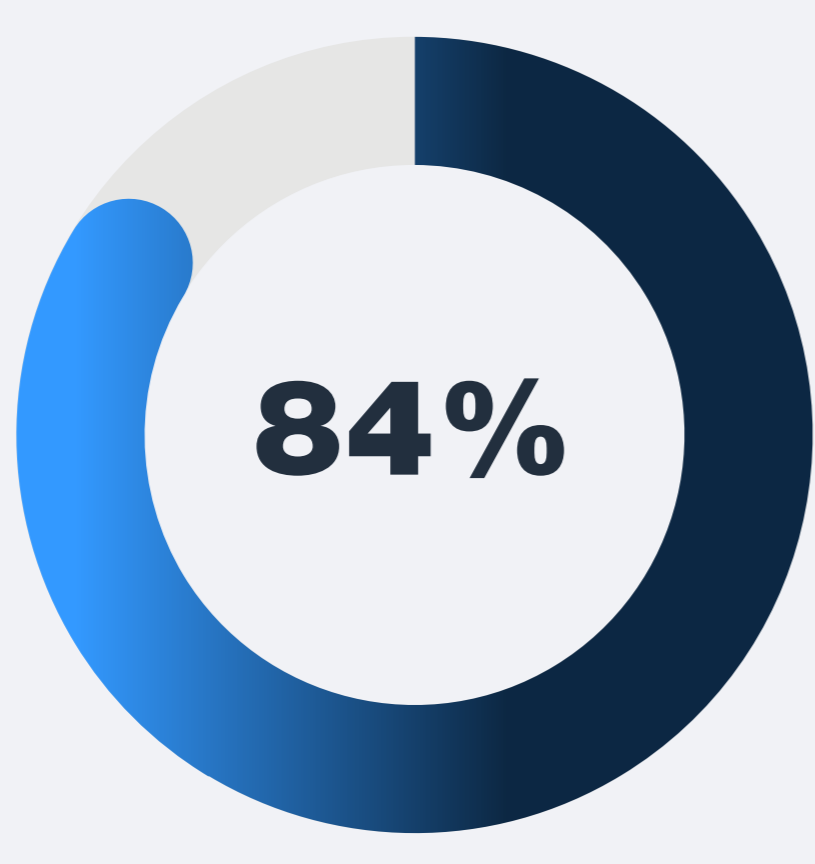

Deploying Parallels RAS reduces the risk of data loss and malicious activity by using policies that limit access based on user, group permissions, locations and devices.

“ We judged Parallels Remote Application Server to be superior in terms of overall security. ”

- Norishige Fujita  
Executive Manager, System Integration Division,  
East Japan Branch, MOM  
Technology Co., Ltd.

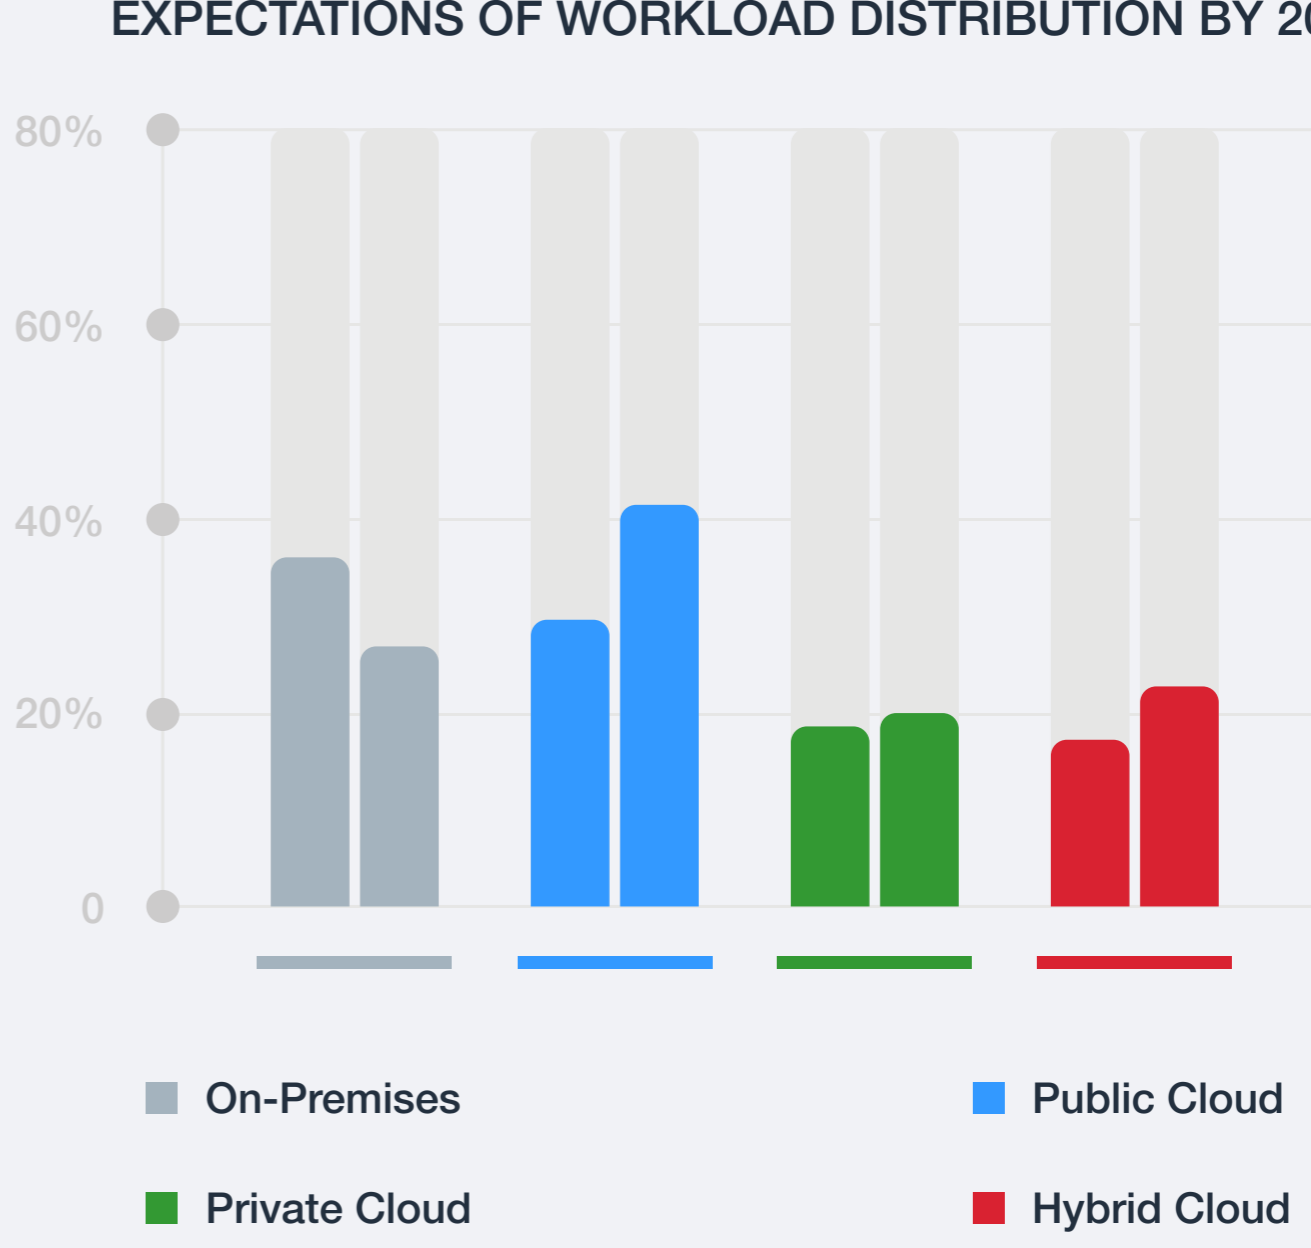

### 3 IS YOUR IT INFRASTRUCTURE AGILE?

Organizations are seeking IT agility to quickly adapt to business needs by automatically scaling up and down their infrastructure.

84% of CIOs said that greater agility would enable their organization to respond quickly to new opportunities

EXPECTATIONS OF WORKLOAD DISTRIBUTION BY 2020

#### IT AGILITY AND BUSINESS READINESS

Parallels RAS allows organizations' IT to quickly address business demands by supporting heterogenous Windows Servers OS environments (2008/R2, 2012/R2, 2016 and 2019), virtualization platforms (VMware ESXi, Microsoft Hyper-V, Nutanix Acropolis and Scale Computing HC3) and cloud platforms such as Microsoft Azure.

“ Parallels RAS was easy to deploy and we can now scale up the environment whenever we need to. ”

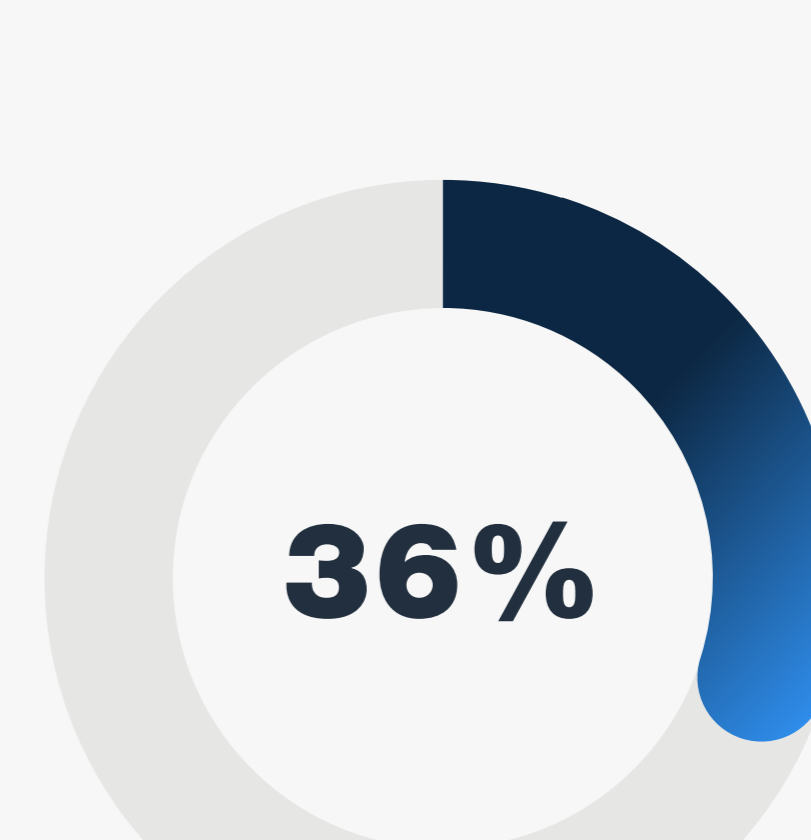

- Tonia Marsh  
IT Operations Manager,  
Cancer Council NSW

### 4 DO YOU WANT TO INCREASE IT STAFF PRODUCTIVITY?

Organizations want IT departments to focus on business-critical projects rather than on day-to-day repetitive tasks.

83% of enterprise workloads are going to be on the cloud by 2020.

of companies adopt cloud technology to relieve IT staff workloads.

#### EASY TO DEPLOY, CONFIGURE AND MAINTAIN

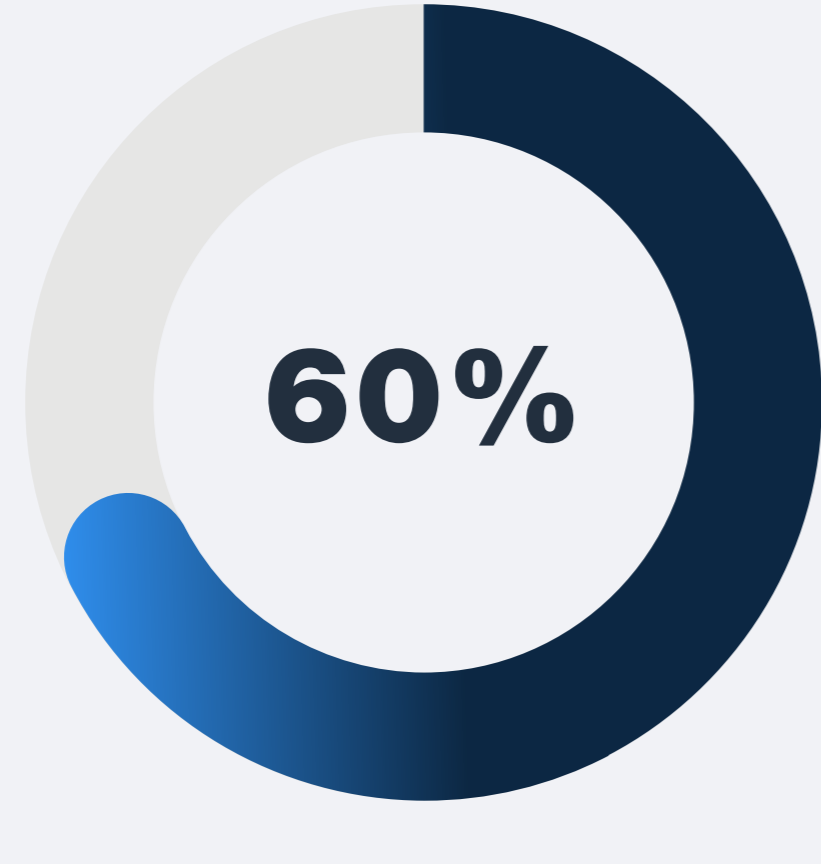

Parallels RAS streamlines the deployment and maintenance of IT infrastructures. A unified and intuitive management console, configuration wizards and customizable set of tools can be used to configure Microsoft Remote Desktop Session Host (RDSH) and VDI, reducing IT workhours easily.

“ The upgrade to Parallels RAS was fast and easy...allowing our office to focus on supporting customers ”

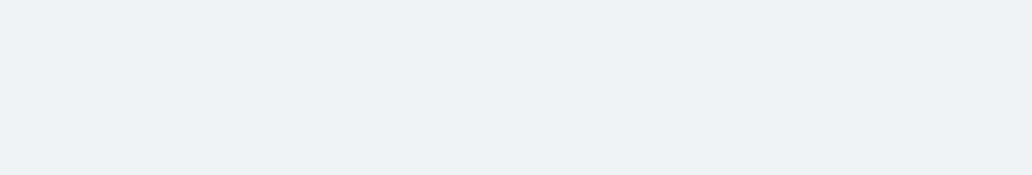

-Martijn Lafeber  
Operations Manager

### 5 DO YOU WANT TO REDUCE IT EXPENDITURES?

As discussed in Gartner's "IT Cost Optimization Should Be an Ongoing Discipline," CIOs have to be reactive about cost optimization, caving to business pressure, and actively leaving money on the table.

Switch to Parallels RAS and reduce up to 60% of your TCO, compared to other solutions

By 2020, 75% of organizations will experience visible business disruptions due to infrastructure and operations skills gaps

#### REDUCE TOTAL COST OF OWNERSHIP (TCO)

Parallels RAS is an all-in-one solution, saving resources, reducing the hardware footprint and lowering overhead costs. A single licensing model incorporates all the product's comprehensive features, and the learning curve for admins is faster due to a minimal amount of free training needed

“ High-quality cross-platform support is the #1 benefit of the switch from Citrix to Parallels Remote Application Server. Now, we are able to efficiently deliver desktops and applications to Linux, Macintosh, and Windows devices with ease. ”

-Todd Zacharias  
Manager,  
IT Network Systems
