IT Service Desk

The background features several overlapping, light teal-colored swirls or brushstrokes that create a sense of motion and depth. These swirls are centered around the text, with some extending towards the corners of the frame.

THE MIDLANDS PREMIER IT SERVICES & SOLUTIONS PROVIDER

IT SERVICE DESK

Providing enterprise-class hardware, software and network support solutions that increase your productivity and maintain optimum system uptime.

There may be occasions when an organisation's in-house IT Department may be overstretched or depleted. In some cases, you may not have the budget to employ full time IT expertise. Your organisation will still be required to safeguard your IT Systems and ensure they are working efficiently so that you can continue to operate effectively, especially now that many technologies are transitioning from physical devices to cloud and software-based applications.

That is why we have tried to make Kuiper Technology Service Desk a simple, user friendly, no nonsense solution to support you and your organisation.

HOW WE WORK

1 WE ANSWER THE TELEPHONE OR RECEIVE YOUR TICKET VIA EMAIL

Our work begins the minute you place your support call or raise a support ticket.

2 WE TROUBLESHOOT THE ISSUE YOU ARE HAVING

We look to understand the issue you are having, reasons behind it and try to find ways to resolve the issue as soon as possible.

3 WE EXPLAIN WHAT COURSE OF ACTION IS NEEDED

We will inform you of what action we need to take, or the steps we will need you or your users take to resolve the issue.

4 WE KNOW WHEN TO ESCALATE

Every member of our IT team is committed to solving your problem, but on occasions we may need to escalate to other members of our IT services team who have increased competency levels or experience for further troubleshooting to resolve your issue.

5 WE TAKE OWNERSHIP

As soon as you report an issue, we take ownership until we have fixed it. We will update you throughout the troubleshooting and resolution process.

6 WE FOLLOW UP

During troubleshooting complex IT issues, we will stay in communication with you or allotted members of your team until the fault is resolved. When this occurs, we make sure will speak to you when we say we will.

OUR SKILLS MATRIX

Below is a list of our technical competencies and key areas of IT that we can support, but this list is not exhaustive. We have further in house and external technical capabilities and experience to draw upon so if there is something not listed, please get in touch and we will ensure that we have the technical know how to service you and your requirements.

Network Security	Operating Systems	Servers & Storage

Our service desk support **excludes** hardware Break Fix maintenance. Break Fix maintenance is available for hardware devices via eCarePlus and mobile devices via mCarePlus, our own brand of IT Break Fix maintenance.

eCarePlus

ENTERPRISE BREAK FIX

eCarePlus is a recognised, established and trusted choice for those who are proactive in their approach to their IT infrastructure. Our Break Fix maintenance services are multi-vendor and any items of hardware can be put under a maintenance agreement from 6 months up to 5 years should you choose to do so. If an item of hardware under cover develops a fault, we will respond and fix it within the agreed service level agreement. If an item isn't under cover you have no need to worry, we are here in case of an emergency and engineers are on hand ready to be called upon ad hoc on a time and materials basis.

We work with all major hardware types – Servers, Storage, Desktops & Laptops, EPoS, Peripherals and Communications hardware – from all leading manufacturers including HP, HPE, Cisco, Dell, IBM, Juniper, Lenovo, EMC, Fujitsu, Huawei, NetApp and many more.

FLEXIBLE SERVICE LEVELS

MULTI-VENDOR SUPPORT

NATIONWIDE SPARES LOCATIONS

UK-BASED SERVICE DESK

mCarePlus

ENTERPRISE BREAK FIX

The mCarePlus warranties we offer extend and enhance the standard manufacturer guarantee and ensure help is always on hand from one of our professionally trained and accredited service engineers.

Collect & Return warranty covers against electrical or component failure. In the event your equipment device failing, we will send a courier to collect it from you. It will then be repaired by a fully qualified service engineer and returned to you within 5 working days.

On-site warranty covers you against electrical or component failure. If your device fails, a fully qualified service engineer will be dispatched to your location the next business day* to repair your device on-site providing a hassle free services.

COLLECT & RETURN

Ideally suited to Smartphones and Tablets, a mCarePlus Collect & Return warranty is a fast and efficient repair service designed to protect your device against electrical/component failure.

*subject to availability

ON SITE MAINTENANCE

A mCarePlus On-Site warranty is designed to deliver both an instant response and rapid repair by providing telephone diagnostics and dispatching a trained engineer to your location.

An aerial photograph of a city, likely London, with a network of white lines and nodes overlaid on the image, suggesting a digital or technological theme. The lines connect various points across the cityscape, including buildings and parks. A circular icon with a document symbol is visible in the upper right corner of the network overlay.

PRICING

We have tried to make Kuiper Technology Service Desk a simple, user friendly, no nonsense solution to support you and your organisation.

That's why we offer two types of IT support; **User Desktop Support** where we price per user per month, and **Infrastructure Support** where we price per device per month. Our **User Desktop Support** covers each individual computer user within your organisation. We define that by your users having a Domain User Profile, being an Active Directory User or having an Office 365 / Microsoft 365 user profile.

Our **Infrastructure Support** covers hardware devices found within your IT network such as Servers, Storage, Firewalls, Routers and Network Switches. Once you decide on the Service Desk Support you require you can then choose from one of two service levels, Standard or Enhanced. Our Standard service level is for Remote Support where you or your users log service tickets to our service desk as required, with our services team responding and providing a resolution as soon as possible.

Our Enhanced service level provides Remote Support with Proactive Monitoring where we use our monitoring software (ConnectWise Automate) to pro-actively monitor your user endpoints and network devices. We continually review if your systems are at their optimum performance along with monitoring their health and status, as well as if there are any potential areas of risk that need to be addressed. We can then plan actions to avoid potential problems from occurring.

USER DESKTOP SUPPORT

Our User Desktop Support covers each individual computer user within your organisation.

We define that by your users having a Domain User Profile, being an Active Directory User or having an Office 365 / Microsoft 365 user profile. For On-Site IT support please refer to our Standard Engineer Day Rates.

SMART HANDS

REMOTE ENGINEER CREDITS (RECS)

Kuiper Technology offer Remote Engineer Credits (telephone, email & remote access) for organisations who want a multi-vendor support service that is designed to be a virtual extension of your own IT team, without the long-term commitment of a fully managed service desk.

With Remote Engineer Credits, you pre-purchase support units by the hour, with a minimum investment of 10 units. Each service desk ticket is then consumed in 30-minute increments. You can use them as much as is required until the allocation of credits has been exhausted or within 12 months of the agreement start date.

Our Remote Engineer Credits have the same technical competencies as those listed in our technical skills matrix so you can be safe in the knowledge that just because you do not take out a service desk subscription, your service level and access to our knowledge base will not be affected.

This service is used to provide reactive technical assistance to organisations who find their internal IT support requires more in depth product knowledge in certain areas, or for when key internal IT staff are on holiday, maternity/paternity, illness or busy with other projects.

WHICH SERVICE IS BEST FOR YOUR BUSINESS?

EXAMPLE 1

10 CREDITS PURCHASED

= 10HRS REMOTE ENGINEER TIME

- > 1 Ticket Raised. Engineer resolves the issue in 25 Minutes
= 0.5 credits consumed (30 minutes).
- > This leaves 9.5 credits remaining to use (9 hours 30 minutes).

EXAMPLE 2

10 CREDITS PURCHASED

= 10HRS REMOTE ENGINEER TIME

- > 8 Tickets Raised. Engineer resolves the issue(s) in 45 minutes per ticket = 8 credits consumed (8 hours).
- > This leaves 2 credits remaining to use (2 hours).

1 X CREDIT
(1 HOUR)

£80

Minimum Investment 10 x credits (£800)

Remote Engineer Credit
Part Code: REC1

Valid for 12 months
